# WEATHER OF CONCERN

## Weather of Concern

- Flash Flood Warning in effect until 2345 hours tonight for areas in El Dorado County.
- Flash Flood Watch in effect from 1100 hours today through late this evening for areas in Siskiyou County.
- Multiple High Wind Warnings in effect throughout the North State and Northeastern Sierras due to the incoming storm front.
- A High Wind Warning is in effect from 1400 hours today until 10/17/16 at 1100 hours for portions of Inyo County.
- Stormy weather will impact portions of Northern California and Southern California through Monday. Two primary waves are expected and will be water and wind related. Periods of heavy precipitation may lead to widespread urban and localized flooding making travel more dangerous.
- The Sacramento Weather area of responsibility, which includes burn scar areas in Lake, Yolo, Butte, El Dorado, Calaveras and Amador counties, advises that the upcoming weather event is not anticipated to produce precipitation rates, over the burn scar areas, which will exceed the debris flow criteria that has been established by the National Weather Service.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

Periods of Heavy Precipitation and Strong Gusty Winds Through Early Monday, Followed by Scattered Showers Until Early Tuesday  
The wet unsettled weather will continue throughout Northern California until early Tuesday. The 1st wave of moderate to heavy rain and strong gusty winds moved through yesterday, bringing wetting rain to all but a few rain-sheltered locations at the far southern end of Northern California. The 2nd wave of moderate to heavy rain and strong gusty winds is spreading across Northwest California this morning. Peak gusts will reach 40-50 mph in many areas today, and wind-prone areas like Weed could possibly see 60 mph or higher. A 3rd wave on Sunday will be slightly weaker. Snow levels will remain 6000-7000 feet through early Sunday, then come down to 5000-6000 feet with the wave on Sunday. The final wave will be over with by midday Monday, and only a few light mountain showers will continue in northern areas until early Tuesday. Rainfall totals from the start of this wet weather this past Thursday through Tuesday will be 0.50-2 inches in the southern valleys and areas east of the Cascade-Sierra crest. Northern valleys and most mountain locations will receive between 2 and 6 inches, while a few mountains in far Northwest California receive 10 inches or more. A warming and drying trend will begin late Tuesday as high pressure builds from the eastern Pacific. A N-NE/offshore surface wind pattern will enhance the warming and drying trend from the western Sierra slopes to the coast Tuesday night through Friday morning, with peak gusts reaching 25-35 mph in wind-prone areas Wednesday and Thursday mornings. However, the drying effects from this wind event will not be sufficient to dry fuels out enough to elevate fire potential much, even in the lower elevations in the south. Temperatures will warm to 5-10 degrees above normal west of the crest late in the week.

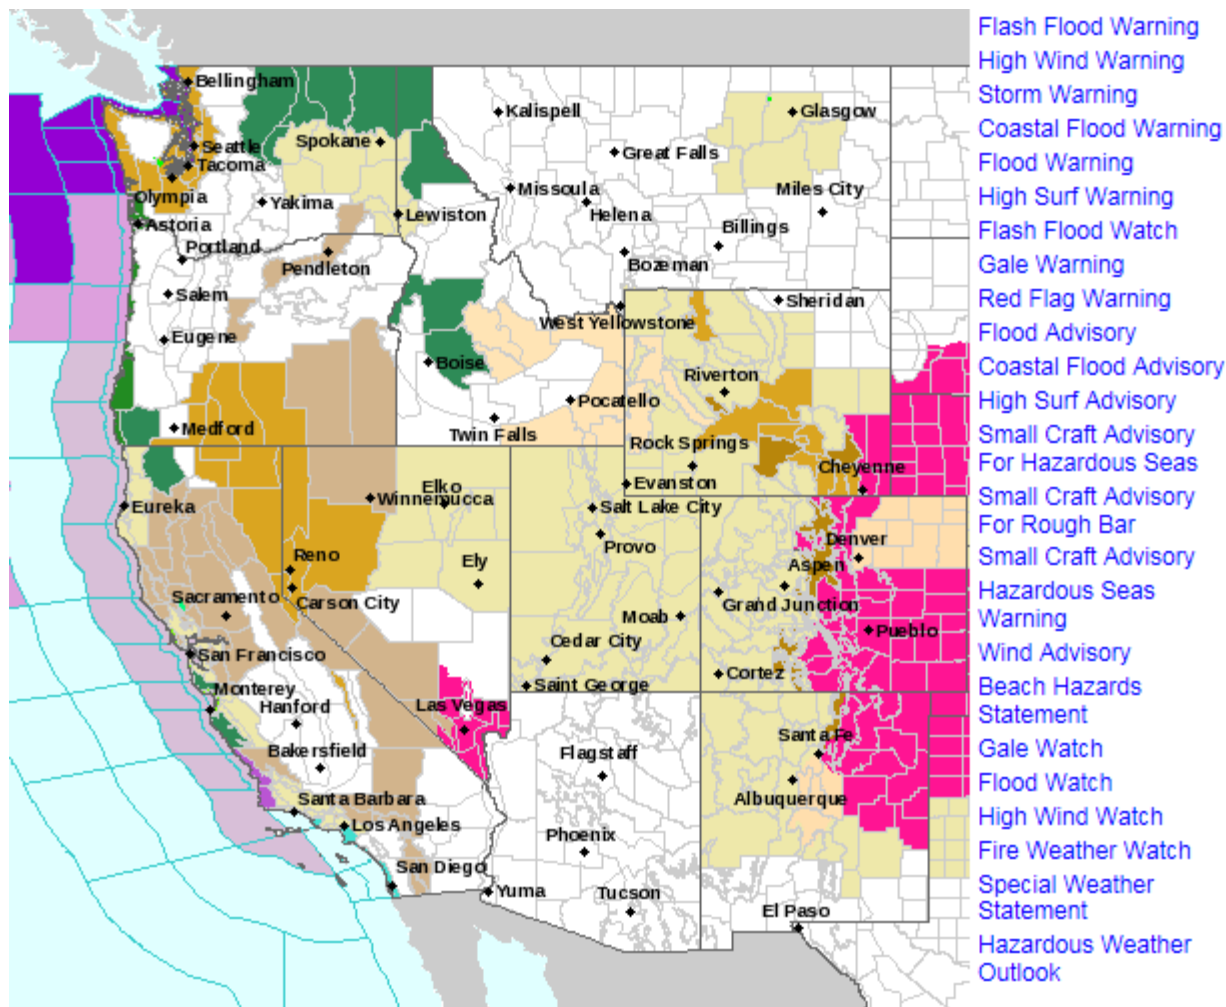

## **SOUTHERN CALIFORNIA**

Windy, hot, and very dry across Southern California Wednesday and Thursday

A series of Pacific storms moving inland to the north will bring scattered showers to Central California through Monday morning. Most locations over Central California will receive an additional quarter inch to half inch of rainfall. However, the Central Sierra and its surrounding foothills will receive up to an additional 2 inches of rainfall. Scattered showers will be possible across Southern California tonight through Sunday morning and again Sunday night through Monday morning, with less than a tenth of an inch of rainfall. Southwest to west winds of 20 to 40 mph with gusts to 60 mph will continue to surface across the mountain ridges and desert passes through Monday afternoon. Temperatures will be a little below normal through Monday, with upper 50s and 60s across the mountains and 70s to low 80s in the valleys today. Minimum humidity will be above 30% away from the deserts through Monday. Rapid warming and drying will take place Tuesday and Wednesday as a strong ridge of high pressure approaches the California Coast. Temperatures will warm into the 90s across the lower elevations of Southern California by Wednesday and there will be widespread minimum humidity in the single digits. Hot and very dry conditions will continue across Southern California through the end of next week. Strong north winds will surface across the South Coast of Santa Barbara and the I-5 Corridor Monday night through Tuesday night and then there be strong northeast to east winds across the mountains and below the canyons and passes of Southern California Wednesday morning through Friday morning.

# CAL OES LAW ENFORCEMENT MISSIONS

## New Cal OES Law Missions

- **2016-LAW-27430 10/14/16, 1840 hours,** International Emergency Response Coordination Center (IERCC) reported a Delorme inReach device activation at coordinates: 36° 10' 39"N, 118° 22' 21"W, which plots along the Kern River in Tulare County. The Registered Owner (R/O) activated it on behalf of another subject (a 45 year old male) who had fallen in the water and suffered what is believed to be a dislocated shoulder. LDO immediately briefed Tulare SO who attempted to dispatch an ambulance, but it was determined there was no vehicle access. Due to darkness, Tulare SO secured CHP H-40 assistance for first light this morning. IERCC was able to communicate this information to the R/O who advised they had provisions for overnight and would shelter in place. **Update: 10/15/16, 0654 hours,** Tulare SO advised that CHP H-40 is enroute. IERCC notified and requested to message the R/O. **Mission Ongoing.**
